
Helical Wall Ties—6mm/8mm dia.

Helical Wall Ties for both new build and remedial applications. These ties are ideal for mortar beds that do not course, and can be driven directly into blockwork or timber constructions.

Benefits:

- Cost effective
- Ideal for thin joint blockwork
- Quick and easy to install
- Can be used in bricks, blocks, concrete, mortar, timber
- Can be installed close to edge of masonry or timber
- No need for pre drilling
- Minimal disfigurement to structure

Features

- Strong, no-bend, 304 stainless steel material
- Simple one-piece design
- Multi-drip along length of tie
- No need for grouts or resin
- Can be installed in cavity or solid masonry
- Tested and proven technology
- Meets requirements of NHBC
