
CDF Weldfasteners with Washer Heads

The CDF range of Weldfasteners is the effective, convenient, speedy, strong and economic method of fixing Insulation to Sheetmetal, Ducting, Metal housings, etc., and incorporates the lock washer in the single weld operation saving time and cost.

- CDF Weldfasteners use a single weld operation which gives significant time and cost savings
- CDF Weldfasteners can be used on a range of sheet metal thicknesses
- Using CDW-72 Welding Machine gives a very high quality of weld without burn mark.
- Weldfasteners can be used in the workshop or onsite due to portability of CDW-72.
- Aluminium faced Insulation can be fixed using the CDF-PAP or ISOL version of fasteners.
- CDF Weldfasteners are a strong assembly of Steel Pin mounted on a Galvanised Steel Washer.
- Pins are 2.7mm diameter, standard lengths 14 to 203mm long and can be Copper coated or Stainless Steel
- Standard Washer heads are 30mm diameter, Galvanised or Stainless Steel.
- A larger fixing surface is available by using the optional 38mm (CDF4) diameter Washer version
