

Stainless Steel Buckles

Product Description/ Specification:

Stainless Steel buckles are used as a securement for our stainless steel banding products to provide an excellent fastening system that offers high resistance to corrosion. These buckles are also referred to as ear-lokt buckles and are used for a variety of industries for general fastening. These are ideal for sign fixing, often the strapping is used with a sign to band it to a post and secured by a buckle or clip.

Specifications:

- Excellent resistance to corrosion
- Excellent fastening strength
- Can be used with different types of stainless steel banding
- Bend ears back to lock banding in
- Suitable for standard duty applications (e.g. hose assemblies)
- Can also be supplied with tooling to secure banding

Design:

Suitable for Banding (Inch)	Buckle Thickness (mm)
1/4	0.8
3/8	1
1/2	1.2
5/8	1.2
3/4	1.5
1	2.0
1-1/4	2.0

Quality:

We are committed to offering quality product with service which is second to none. The material is produced to meet relevant ASTM /BS EN standards.

Further information on Mechanical and chemical properties of stainless steel used can be supplied on request.

Safety:

There are no known health risks in handling stainless steel, although it is recommended that gloves should be worn in case of sharp edges. Good lifting practice techniques should always be followed when handling these products.
