

Wire Clasp Tie

Lateral Restraint Products

These products allow masonry walls to be restrained back to other elements of the structure. This could be pre-existing walls, or new or pre-existing steel work. The ties, once in position, prevent sideways movement between a wall and another structure.

Wire Clasp Tie

Wire Clasp Tie, fixed to the side of stanchion but also allowing extra movement with the flex of the wire section.

Sizes:	150mm	250mm
	175mm	275mm
	200mm	300mm
	225mm	

Performance

V97 for up to 135mm Cavity	
Tension Capacity at Mortar End	2076N
Tension Capacity at Steel End	1370N
Compression Capacity	1160N
Minimum Embedment	62.5mm
Minimum Mortar Joint	10mm

Safety Precautions

Wire Clasp Ties are manufactured from sheared plate and strip so may contain sharp edges. Suitable personal protection should always be used when handling/installing these products.
