

Frame Cramp Wall Ties

Lateral Restraint Products

These products allow masonry walls to be restrained back to other elements of the structure. This could be pre-existing walls, or new or pre-existing steel work. The ties, once in position, prevent sideways movement between a wall and another structure.

Frame Cramp Wall Ties

Supplied in stainless or galvanised steel.

For restraining masonry to new or existing structures and for building in non-structural elements (frames etc).

Sizes:

75mm	200mm
100mm	225mm
125mm	250mm
150mm	275mm
175mm	300mm

Performance

Frame Cramp 75mm—300mm

Shear Load Capacity	1180N
Minimum Embedment	62.5mm
