

Aluminium Banding

Product Description/ Specification:

Aluminium Banding are used as fixing system in insulation and HVAC industries. BS Stainless specialise in the supply of high performance banding for all applications. Banding are manufactured in the UK within the scope of ISO 9001:2008 management system.

The banding are manufactured from wrought aluminium alloy 3003 or 3015.

Dimensions:

Standard Widths of Banding Supplied are:

1/2" (13mm), 5/8" (16mm), 3/4" (19mm), 1" (25mm) - Other sizes available

Most Common thickness—0.4mm & 0.5mm, different thicknesses can be produced as per requirement

Tolerance:

Thickness +/- 0.1 mm and Width +/- 1 mm

Packaging:

All coils are in catch weight suitable for lifting by hand. Aluminium is soft so the edge after processing is normally quite smooth and safe although for safety gloves should always be worn.

Materials will be shipped on wooden pallets approximately 1000mm X 1200mm X 500mm and shrink wrapped. Heat treated pallets will be supplied where requested.
